Polygraph Pro Suite v 4.6

v 4.6.2.1

Released: August 21, 2024

Patches

- Resolved issue that Menu item for Updating software opened link that is no longer valid
- Modified NCCA export to conform to standards
    - Swapped data contained in EDA1 and EDA2 columns to match LXEdge
        - EDA1 now contains "EDA RAW" sensor data and will be imported into LXEdge as "Manual"
        - EDA2 now contains "EDA" sensor data and will be imported into LXEdge as "Automatic"
    - Resolved filenames being incorrect
    - Events list is now properly implemented
    - Fixed certain cases where valid export data could be negative
    - Added missing start and stop questions ("X" and "XX")
    - Added label handling for DLST exams; these exams no longer repeat the question type
    - Modified question set templates to adhere to NCCA output standards
    - Removed ability to edit or add question types
    - Show the correct value "Number of channels"
    - Resolved issue with NCCA exporting masked PFs

v 4.6.1.1

Released: June 3, 2024

Patches

- Resolved intermittent errors when loading the scoring application.

v 4.6.1

Released: April 26, 2024

Patches

- Resolved issues when loading settings so that mixed culture files will correctly be interpreted.
- Resolved issues when saving settings so that decimal values are always written in Invariant Culture format, thus preventing mixed culture files.
